Objectives and limitations of this guide

The information in this Guide sets out the LGPS Secretariat's understanding of how supplementary pension increases are applied to LGPS lump sums. It is based on the:

- Social Security Pensions Act 1975 (SSPA 1975)
- Pensions Increase Act 1971 (PIA 1971)
- Pensions Increase (Review) Orders

This guide:

- assumes that entitlement to the lump sum has already been determined,
- assumes that any increases applied by way of the Public Service Pensions Revaluation Order under s.9 of the Public Service Pension Schemes Act (PSPA) 2013 have already occurred (where appropriate), before the application of the above legislation. This is covered in the '[Revaluation](#)' technical guide, and
- does not cover how pension increases should be applied to a pension in payment. This is covered in '[The application of increases to LGPS pensions in payment](#)' guide.

both of these guides can be found in the [guides and sample documents page](#) of www.lgpsregs.org.

Background

Section 59 of the Social Security Pensions Act 1975 provides for public service pensions to be increased annually by the same percentage as additional pensions (State Earnings Related Pension and State Second Pension). Each February/March, a Pensions Increase (Review) Order is laid (in line with the September-to-September increase in the Consumer Prices Index (CPI)), setting out the increases that apply to deferred pensions and lump sums from the effective date of the Order. The Pensions (Increase) Act 1971 defines certain terms and sets out when a pension 'begins' and how the increase applies to lump sums.

In earlier Orders supplementary increases to lump sums were laid down in 'article 4', though over the years this changed and the increases are now laid down in 'article 3' (albeit the explanatory memorandum still makes reference to 'article 4'). These increases have had a number of historical names for example: 'supp PI', 'article 4 payments', 'article 3 payments' etc. This guide refers to these payments as 'supplementary pensions increase'.

Supplementary pensions increase may be paid in respect of a **Pension Commencement Lump Sum (PCLS)**, **Serious Ill Health Lump Sum** (pre 1 April 2008 leavers, councillors and certain pension credit members) and a **Defined Benefits Lump Sum Death Benefit (DBLSDB)**, depending upon circumstances. These are set out in the sections titled [supplementary pensions increase](#) further within this guide. These sections include supplementary pensions increase payable in respect of active, deferred, pensioner and councillor members. There are three separate sections that look at pension credit members in isolation as these cases do not easily fit into the earlier sections.

For completeness, this guide also includes a [full list](#) of all of lump sum payments payable from the LGPS together with the reasons as to why supplementary pensions increase is not payable in respect of certain lump sums.

Combined CARE and Final Salary lump sums

There will be occasions when a lump sum is made up of both CARE and Final Salary elements. Where this is the case, the rules for each element should be followed and the results added together to reach the total supplementary pensions increase payable. There will be occasions where differing pension increases apply to different elements of the lump sum, however, there is an outstanding regulatory query.

When applying supplementary PI, it is clear that the intention is to split the lump sum between those built up from final salary benefits and those built up from CARE benefits. The LGPS (Transitional Provisions, Savings and Amendment) Regulations 2014 do contain a provision for the purposes of working out these splits for death grants (regulation 13(2)), but they are silent for other purposes. This has been notified to MHCLG and is LGA query number 99 which can be found in the document titled 'LGA queries with MHCLG' published in the ['2019 Technical Group minutes'](#) page of www.lgpsregs.org.

Supplementary Pensions Increase (PI) and Defined Benefits Lump Sum Death Benefit (DBLSDB)

Supplementary PI – payment of benefits after date of leaving active membership and death occurs in the same year

Note: where a member takes payment of their benefits (at a date after the day after leaving active membership) and the member dies within that same scheme year, supplementary PI is payable on both the Death Grant and the PCLS because they are two separate events. The supplementary PI due on the:

- death grant is based on the period from the later of 'date of leaving/effective date of the PI order' to the day ~~before the date~~ of death. Whilst this might appear that the supplementary PI has been paid twice this is not the case because the variables within a death grant are always calculated in accordance with the LGPS Regulations which excludes the PI Act 1971. Thereafter, PI is added to the net death grant to bring the outcome in line with current values.
- PCLS is based on the period from the later of 'date of leaving/effective date of the PI order' to the day before the date of payment of the PCLS. This is a BCE9 and is a 'Pension Commencement like' lump sum made to the personal representatives. This is in accordance with regulation 19 of the Registered Pension Schemes (Authorised Payments) Regulations 2009 [SI 2009/1171]. For further information see [PTM088100](#) and [PTM088700](#).

Pension credit members – definition of terms

The following three sections covering the payment of lump sums in respect of pension credit members.

Pension credit members do not build up final salary benefits or CARE benefits, rather an actuarial credit is awarded to the pension credit member, effective from the date of the pension sharing order.

Pension credits are termed as Pre 2014, Post 2014 or councillor pension credits. Where reference is made to these terms in the following sections, they are defined as:

Description	Definition
Post 2014 pension credit	A pension credit with a transfer day of on or after 1 April 2014 and where the debited member left active membership of the LGPS on or after 1 April 2014.
Pre 2014 pension credit	A pension credit with a transfer day of before 1 April 2014 or where the debited member left active membership of the LGPS before 1 April 2014.
Councillor pension credit	A pension credit in respect of a Councillor member.
